Art Unit: 3711

Claims 1, 5, 6, 11, 12, 18, and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Because soccer balls come in all sizes and can be "non-inflated" to various degrees it is unclear what limits are placed on the ball by the "non-inflated soccer ball" recitation.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 5, 18, and 19 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Armstrong, III et al. Because it is unclear what size ball is contemplated by the claims Armstrong's tennis ball sized ball anticipates the

Art Unit: 3711

claimed device. Alternatively Armstrong states that the ball may be made of whatever size is desired. In view of such a teaching it would have been obvious to have made the ball of the size recited by applicant.

Claims 6, 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Armstrong in view of Hawkins, Sr. et al. (Hawkins) or Bottiglieri. Armstrong discloses the claimed system with the exception of the type of target used. However, such targets are commonly known and used in the art as typified by Hawkins and Bottiglieri. It would have been obvious to one of ordinary skill in the art to use such a target in Armstrong's system as well in order to add interest to the game.

In response to applicant's arguments, a "range of sizes" has no limits and therefore the rejection under 35 U.S.C. 112 second paragraph stands. Moreover, applicant is claiming another variable - the degree of inflation which adds a further degree of uncertainty to the limitations of the size of the ball.

Regarding the art rejections, the examiner has seen "soccer balls" as small as a tennis ball for small children or for dogs so that they may get the ball in their mouth. Moreover, as the reference states the size may be varied and applicant has not limited the claimed ball to any particular size.

Applicant's arguments filed 9/4/02 have been fully considered but they are not persuasive.

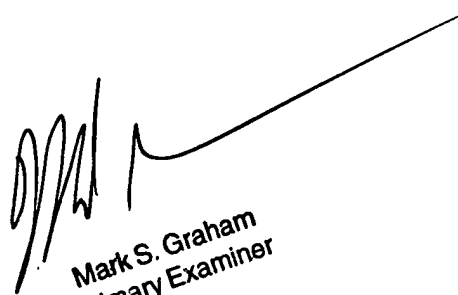

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3711

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
